Summit Leaders Vow to Push For an Economic Recovery

Peace Pledge Is Set After Long Debate

By Don Oberdorfer

Washington Post Service
WILLIAMSBURG, Virginia After a spirited internal debate that lasted nearly 24 hours, the leaders of the world's leading industrial democracies pledged their full political resources Sunday night to reducing the risk of war. They called oo the Soviet Union to "contribute constructively" to negotiadons in remove ouclear missiles from Europe.

Their seven-paragraph statement was made public by Secretary of State George P. Shnitz about seven hours later than planned, reflecting a dispute about its tone, substance and appropriateness among the seven heads of government, who sent at least one draft back to their

foreign ministers to be rewritten. As finally approved, the declaration was more ; live in its emphasis oo peace and more concilia-tory in its approach to the Soviet Union than most recent statements of the Western alliance.

There was no shift, however, in the established negotiating position of the alliance in ouclear arms control oegotiations at Geneva.

The declaration said specifically that if the United States and the Soviet Union failed to reach agree-ment oo limiting medium-range ouclear missiles in Europe, "the countries concerned will proceed with the planned deployment" of oew U.S. Pershing-2 and cruise missiles in Western European countries beginning in December.

Mr. Shuitz, in a news conference, called the declaration "strong, pos-itive" and "very important," and indicated that it constituted an authoritative response to the Soviet Union's "shot across the bow" on this issue last week. He referred to the Soviet threat to put new oucle ar missiles in Eastern Europe if new U.S. missiles were placed in West Germany. NATO's 1979 decision on the U.S. missiles was itself out," said a European Comcharacterized as a response to de-

ployment of SS-20 medium-range siles in European Soviet Union. to be done." Mr. Shultz ooted that this was the first security statement adopted at the annual economic summit meetings, which began in 1975. It was also Japan's strongest backing

France's minister of external reoot bere as a super-NATO," and that the French government "did not want the first and only ocws that his economic recovery profrom this summit to be on arms

Mr. Chevsson said the declaration did oot commit the signers to any particular position in oegotiadons with the Soviet Union.

In the statement, the leaders of the United States, Canada, Britain, attack, to counter any threat and in assure the peace," while adding that "our arms will never be used except in response to aggression.

They also declared, "We commit ourselves to devote our full political resources to reducing the threat of war." The main emphasis in the statement was on the search for reduction of arms and tensions through negotiations, which the leaders said they would pursue with impetus and urgency.

A range of negotiations was mentioned, including those on nu-(Continued on Page 2, Col. 1)

ter a breakfast meeting on Monday in Williamsburg.

WesternLeadersDoubt ada, Japan and by Foreign Minister Francis Pym, representing Britain. Britain's prime minister, Margaret Thatcher, left the meeting U.S. Recovery's Power

By Clyde H. Farnsworth New York Times Service

WILLIAMSBURG, Virginia — Leaders attending the ecocomic summit meeting on Sunday chal-lenged President Ronald Reagan's assurances that economic recovery in the United States is enough to bring prosperity to the rest of the

They insisted that their economies would remain in the doldrums unless American interest rates were lowered and the federal budget deficit reduced even more than Mr. Reagan has proposed, reporters were told at briefings led by aides

munity official. 'The Europeans fear that things will oot look after themselves and that more will have

Secretary of State George P. Shultz acknowledged some of the problems in a statement he read as the conference ended its afternoon for the NATO approach in oegoo-ations on ouclear missiles in Eu-ment, high interest rates, high budget delicits and rising protectionism were "matters of concern."

At the same time, "Confidence was expressed in a spirit of realistic optimism that the recovery is getting under way," he said.

Mr. Reagan had said in a num-

ber of preconference interviews gram was on track and that little more needed to be done to get a global recovery going.

This view was challenged during a meeting of Mr. Reagan and the leaders of Canada, Japan, Britain, France, West Germany and Italy. They met for three hours Sunday morning at the restored House of Burgesses, joined in the tirst nour by their foreign ministers. The discussions continued during a twohour lunch and at a three-hour meeting Suoday afternoon.

Prime Mioister Margaret Thatcher of Britain praised Mr. Reagan for progress in bringing down interest rates, although she asis in the joined others in challenging his views on the role of U.S. economic recovery, officials said.

The leaders argued that high

U.S. budget deficits threatened to keep interest rates high and abort economic recovery. Canadian officials said Prime Minister Pierre Eltain of the world's economic problems, among them unemployment, "more structural" in nature and "will oeed something more than recovery to deal with."

Mr. Reagan, according to officials here, told the other leaders that the United States had already made great progress in reducing in-flation and interest rates and that ne expected further progress.

Mrs. Thatcher, according to Brit-ish officials, said that "the recovery could be at risk" as a result of high interest rates and high unemployment and that high unemployment was "not susceptible to quick Cares." All the summit leaders acknowl-

President Belisario Betancur of Colombia and Prime Minister Indira Gandhi of India were among Third World leaders who sent telegrams to the leaders bere urging that a greater flow of resources be permitted to poorer countries.

Vogel Reports E. Berlin Seeks Improved Ties

BONN - The East German leader, Erich Honecker, wants m improve ties with West Germany despite canceling a recent visit to Bonn, a top leader of the Social Democratic opposi-

tion said Monday.

Hans-Jochen Vogel, defeated candidate for chancellor in the March elections, met Mr. Honecker in East Berlin Sun-day. He said at a press conference in Bonn that Mr. Honecker argued that recent setbacks in relations should not be allowed to interfere with their general development.

Mr. Honecker has made a senies of conciliatory statements toward Bonn, but they have been accompanied by warnings against NATO's deployment of new U.S. nuclear missiles in West Germany. Mr. Honecker canceled a visit to Bonn a mans died in East German custody, sparking criticism of the Communist authorities.

U.S. Says 7 In 'Broad' Agreement

Compiled by Our Staff From Dispatches
WILLIAMSBURG, Virginia —
President Ronald Reagan and the
leaders of the largest industrialized democracies represented bere agreed Monday to work to reduce high unemployment and interest rates and to push for economic re-

The leaders called for reducing budget deficits, especially by restricting the growth of government

"The industrialized democracies continue to face the challenge of ensuring that the recovery materializes and endures, in order to reverse a decade of cumulative inflation and reduce noemployment. the statement said.

The final statement was read by President Reagan to a hall of jour-nalists and government officials. He was flanked by the leaders of France, West Germany, Italy, Canre-election.

After the more than three-hour norning session, Mr. Reagan said he and the other leaders had ac-complished "a great deal." You can see how happy we

The summit participants called for further studies of a proposal by President François Mitterrand of France for the convening of a world mooetary conference that would be the first since World War

The seven nations said they were committed to halt trade protectionism and to dismantle barriers that made it hard for Third World countries to compete effectively in

selling their products. The final communique ordered edged that the Third World had a the finance ministers in consult Mooetary Fund to define the conditions needed for improving the world monetary system.

The finance ministers were asked to "consider the part which might, in due course, be played in this process by a high-level internation-

al monetary conference." The Reagan administration doubts that a new conference will belp spur world recovery and many officials at the conference questioned whether such a meeting would take place.

In another gesture to France, the summit participants said they were willing to "undertake coordinated intervention in exchange markets in instances where it is agreed that such intervention would be help-

Larry M. Speakes, the deputy White House press secretary, played down reports that the leaders of Canada, Britain, France, Italy, Japan and West Germany had complained about the debilitating effect of high U.S. interest rates and budget deficits on their econo-

mies.
"I think there's understanding by the summit participants of the U.S. deficit situation," he said. He said there was "broad agree ment on most economic subjects."

Mr. Reagan has emphasized in recent days that a robust economic recovery would help alleviate many of the problems the leaders meeting here are confronting at home. U.S. officials contend that the

budget deficits, expected to run around \$200 billion this year, have no direct bearing on interest rates. But they have expressed concern (Continued on Page 2, Col. 4)

By Michael Getler Washington Post Service

WASHINGTON - The State Department and the Pentagon are tilting in opposite directions on the complex and politically delicate question of how to change the U.S. position at the strategic arms reduction talks scheduled to resume in Geneva on June 8.

A main internal debate centers around throw-weight - how much an intercontinental missile can deliver. The Soviet Union has a hig edge in throw-weight.

In general, the Pentagon wants to emphasize throw-weight in a revised proposal and to demand sharp Soviet cuts leading to eventu-al equality. The State Department wants to place somewhat less emphasis on it

How the differences over throwweight and other issues are re-solved could have an important impact on Capitol Hill. A number of

the U.S. proposal would become that NATO is scheduled to begin a shift by both sides to smaller mis-more negotiable, and that both na-deploying in West Germany in De-siles. tions would move toward less dan- cember, and left only the less-congerous ouclear weapons than the 10-warhead MX and its Soviet

differences, or at least some of them, to be resolved at a meeting with Mr. Reagan and the National
Security Council scheduled for Helmut Schmidt of West Germany
June 7. The president undoubtedly said last week that he found the will have to consider not just the walk-in-the-woods formula acceptstrategic merits of the competing able, positions, but the likely impact of his decision on the bipartisanship he has tried to build in Congress on

A vague but potentially more ex- dation of a bipartisan commission plosive problem could be develop-ing fur Mr. Reagan in West Ger-many, where there is interest in an and former national security informal plan worked out last year during a now-famous "walk in the woods" by U.S. and Soviet negotia-tors at the parallel talks in Geneva on intermediate-range nuclear mis-

The current U.S. proposal, subtroversial cruise missiles to be de-ployed in several Western Europe-sides to reduce the number of individual missile warheads by about a third to 5,000 each, and the number of land and submarine missiles to 850. The Russians have about 2,350 missiles and the United States about 1,600.

The proposal also includes limits on the higgest Soviet missiles, the SS-17, 18 and 19, so that there The Reagan administration could be only 210 of all three types greed last month to alter its procombined. This would constitute an indirect limit on Soviet throwposal for the strategic arms reduc-

ion talks based on the recommen-The U.S. proposal, however, also has a second phase to be negotialed after an initial agreement. This calls for much steeper cuts in Soviet throw-weight until both sides have equal amounts.

The commission recommended There is now the possibility that what Mr. Reagan wanted most — deployment of 100 MX missiles a new U.S. proposal will call for only noe phase and in that case the Pentagon wants throw-weight equality emphasized. The Soviet missiles now have about two and a half times as much collective throw-weight as the United States, and many in the State Department believe it to be too big a disparity to expect the Kremlin to accept.

The State Department favors re-taining the existing limits proposed for the higgest Soviet missiles as an indirect measure of throw-weight sign a hlank check giving the U.S. be presented on the use of electron-unlimited help in a conflict with ic warfare as a nonnuclear deter-There seems to be agreement that the 5,000-warhead ceiling should

be retained, but there is argument over the 850-missile caling. The State Department wants to increase it, reportedly to 1,100 to 1,200 missiles. This would make room for the small missiles recom-mended by Mr. Scowcroft, and it would also move closer to a Soviet proposal that calls for roughly 1,800 strategic missiles and bomb-ers on both sides.

Although the joint chiefs reportedly favor the 850-missile ceiling civilians at the Pentagon want to focus instead on a combination of warheads and throw-weight.

but it also called for U.S. develop-Democrats and moderate Republicans in Congress supported the MX missile in the expectation that mated the U.S. Pershing-2 missiles and for changes that could lead to New Soviet Warning on Missiles To Be Discussed at NATO Talks

BRUSSELS — Defense ministers of the North Atlantic Treaty Organization's European members will discuss the Kremlin's latest warning on nuclear missiles when they meet Tuesday a day ahead of a full alliance discussion on East-

West issues, diplomats said.
The full meeting of NATO defense ministers Wednesday is expected to strongly condemn Moscow's statement that it would re-taliate against deployment of U.S. medium-range missiles in Western wrope with additional deploynents of their own, they added.

We are obviously disappointed gy to NATO's needs. A report will meetings. Europe with additional deployments of their own, they added.

WORLD BRIEFS

Thatcher's Foes Assail Summit

LONDON (UPI) — "Nothing happened at Williamsburg insofar as the world economy is concerned except a slight mutual congratulation session when there was nothing to congratulate anybody about," charged the Social Democratic alliance's leader, Roy Jenkins, Monday in an attempt to deflate any political capital Frime Minister Margaret Thatcher might gain from her trip to the United States.
"Mrs. Thatcher went to that summit conference represent

"Mrs. Thatcher went to that summit conference representing a government that has the worst record on unemployment than any of the others there," added the Labor leader. Michael Foot, "Apparently she did noth-

ing to try and get a change in that policy."

The opposition pressed their attack as Mrs. Thatcher increased her already formidable lead in the opinion polls with only 10 days to go before the general election.

CIA Study Sees No Soviet Collapse

WASHINGTON (AP) — The Soviet economy will probably have a low growth rate throughout the 1980s but will not be in danger of collapsing, according to a CIA analysis released Monday. An agency report, prepared for the congressional Joint Economic Committee, said that it was unlikely that the Kremlin would undertake radical reforms.

"The Soviet economy, despite its monstrous inefficiencies and irra-tionalities, grinds on," the agency analysis said. "It does not face collapse or a precipitate decline." It also cautioned that efforts to exert pressure on Moscow by using trade embargoes or other economic sanctions "run the risk of boomeranging" because of potential serious damage to the West's economic interests.

Some U.S. officials have suggested that major economic setbacks, com bined with ethnic-group tensions and other social problems, could lead to a collapse of the Soviet system. However, the CIA study concluded that "Soviet economic prospects do not look so bleak that drastic systemic changes seem inevitable."

Afghans Report Attack on Base

ISLAMABAD, Pakistan (AP) - Moslem rebels claimed Monday to have attacked a major military air base west of Kabul, destroying two helicopters and killing 21 government and Soviet troops. The claims, which could not be confirmed by independent sources, would make it the fifth guerrilla assault on Jalalabad airport in the past

Resistance sources said guerrillas, equipped with mortars and rocket launchers, mounted the offensive Wednesday and knocked out two helicopters parked on the runway. Four Russians were among those killed,

Greeks Protest Labor Legislation

ATHENS (AP) — Greek workers staged strikes and demonstrations Monday against legislation that, they say, will severely curtail the right to

More than 30,000 bank employees stayed off the job for the third straight working day to protest the Socialist government's legislation, 1 expected to pass in Parliament Monday night. They were joined by transportation, construction and public power employees in Athens and 10,000 workers in the Piracus harbor, In Salonica, about 10,000 strikers marched to the Ministry of Northern Greece and presented a resolution by demanding that the legislation be withdrawn.

The bill applies the government's policy of socialization, or worker participation in management, and decision-making to the public sector. But it also rules that public sector strikes must be approved by an overall majority of union members in a secret ballot. Labor unions say the measure would curb the freedom to strike, but the government says it would make labor strikes more democratic.

Protestants Boycott Irish Talks

gain for arms reductions. Mr. Weioberger adopted a reassuring tone, however, promising his audience of cabinet ministers, former ministers and other dignitaries that Mr. Reagan "is personally and deeply committed to reducing ouclear weapons." He twice departed from his prepared text to promise that the U.S. is not seeking ouclear

of skeptical questions about Mr. Reagan's commitment to arms control, about the president's harsh thetoric and about Mr. Weinberger's own past statements about fighting "a protracted ouclear war." He was also asked about Mr.

In his newspaper interview, Mr. Weinberger called that suggestion "absolutely incredible." Monday night he avoided any challenge in Mr. Schmidt. "I would be very hopeful that that was a misquotation," he said. But he reiterated the administration's commitment to arms reductions.

"There is nothing whatever to the suggestion that we have been insincere or laggard or indeed ineffective in our proposals," Mr.

Weinberger said. In a related matter, Mr. Weinberger said the Soviet Union has responded favorably to Mr. Reagan's proposal to improve the quality of the "hot line" communications link between Washington

and Moscow.

However, the Kremlin does not seem interested, Mr. Weinberger said, in other "confidence-building" measures that Mr. Reagan proposed recently to reduce the possibility of accidental nuclear war. Those proposals included cooperation against terrorist activities, regular meetings between So-viet and U.S. military officers and

An Odd Couple in Southern Africa Amail Summi Black-Ruled Mozambique Still Relies on Pretoria

By Alan Cowell New York Times Service

MAPUTO, Mozambique the view of Mozambique and other black-ruled African nations in this region, white-ruled South Africa is a focus of evil, a government that preys on its neighbors' frailties. But the relationship is more than that, for the demon is also a kind

A history of colonial dependence has left Mozambique heavily reliant on a neighbor whose policies of racial separation it abhors but whose military and economic strength cannot be ignored.

The electricity here, for instance, comes from South Africa, so that, should Pretoria wish it, this city and its faltering industries could be brought to a halt. Figures are not published, but it

generally acknowledged that South Africa is Mozambique's biggest commercial partner. About 40,000 Mozambicans

work in South African mines, and hundreds of thousands more hold down menial illegal jobs, providing a source of hard currency.

The Cabora Bassa Dam in northern Mozambique feeds electricity to South Africa and not to

the country in which it is situated. The dam supplied about 9 percent of South Africa's electricity in 1978; in 1979; the sale of electricity brought about \$50 million to Ma-

Of the trade that passes through the port here, half is South African, underscoring Mozambique's tradi-tional role as a distribution center for a hinterland dependent on the - good will or good fortune of others. The relationship between the two countries is complex, for mutual political antipathy is translated on the ground into backing for each other's armed enemies.

Mozambique, a senior official said, will not, for instance, aban-

WASHINGTON - Lawyers for

nent movement lighting South Af- and have moved some of them to separation. Yet the consequences of its commitment are unpalatable. East week, South African planes swept over Maputo in a reprisal

claimed responsibility. The message was clear: Mozambique is volnerable, and South Africa can, with impunity, invade and disrupt and The Pretoria attack, and its retal-

iation, followed several months during which the uneasy neighbors had sought to establish a relationship that, if not intimate, at least averted a blossoming of conflict that could involve other powers. The United States is said by well-placed officials here to have

encouraged the overtures between the two nations, which began last December when ministers from the two sides met. They met again at the same place in early May, and Mozambi-can officials have made clear that,

despite the air raid; they would attend another meeting.

The bargain that is sought, and which coincides with the Reagan administration's public quest for a broad reduction of tension in this

area, seems clear.
South Africa, seeking a nonaggression pact, wants Mozambique to block the transit corridor that enables ANC units to infiltrate through Mozambique and Swazi-land into South Africa.

Mozambique, in turn, wants South Africa to withdraw its evident - if often denied - backing for the Mozambique National Re- loath to do so. sistance, a group of as many as 12,000 rebellious Mozambicans that is causing havoe in many areas of the country.

Mozambique could be ruined by South Africa, and that appears to been that support from con-Afri-be the reason that its leaders have can countries will not be invoked don its support of the African Na-tional Congress, the most promi-of ANC personnel in its capital can invasion.

Mozambique, 100, appears to have adopted a view whereby South Africa, as an independent nation, cannot be placed in the raid following a car bombing in same category as, say, Zimbabwe. Pretoria for which the ANC When Zimbabwe was still Rhodesia, the Maputo authorities openly supported, and Mozambicans

fought in, a guerrilla war against

the white-minority colonial regime

Thus, it is ideologically possible for Mozambique to argue that South Africa's iniquities are a mat-ter for internal resolution, not overthrow from without

In the Mozambican point of view, South Africa's own attitude to the authorities here is not without ambiguity. The activities of the resistance movement, which have led to conditions in some provinces said to resemble anarchy, have brought great instability and a challenge to the government of President Samora Machel.

Yes, a senior official said. South Africa does not seem to perceive an interest in engineering his over-

"It makes more sense for South Africa to have an unstable Marxist regime on its borders," said the Mozambican official, "than to topple Machel and replace him with a client state that would cost a lot to support."
So far, President Machel has not

country of their choice.

Other Opinion

Memorial Day will have had a poignant war has resulted in about 30,000 civilian meaning for the family of Albert A. Schaufeldeaths, most at the hands of government seberger 3d, USN, the first American adviser to die in El Salvador. He was sent to that country to help save it from the savagery that claimed him. Who were his executioners? A distraught United States official had this first response: "It could have been from the left, it could have been from the right. You never know here."

That could serve as an epitaph for a policy as well as an officer. A confused civil war in a confused region has jarred an administration with a taste for simplistic analyses and pre-scriptions. Thomas Enders, the State Department's chief of hemisphere affairs and a tough-minded pragmatist, has now been re-placed for the offense of thinking otherwise.

The essence of the Salvadoran tragedy is that no one is certain who the villains really are. Or where they are. Death came to Mr. Schaufelberger not in battle but on the streets of San Salvador, at the hands of four gunmen proficient in a bloody trade.

The deed was apparently ordered by the most radical of guerrilla factions to disrupt a planned sweep by the Salvadoran Army. But you never know in El Salvador, and North Americans there had plenty of reason for a panicky suspicion that right-wing death squads were to blame. The three-year-old civil

Fidel Castro has done few things nastier than slipping several thousand criminals and other misfits into the group of 125,000 people

that he allowed to set sail for Florida from the port of Mariel in 1980. Humanitarian feeling

and public pressure led Jimmy Carter to wel-

come them all with "open arms," and without

the usual screening.

Though most of the Mariel group fitted in

fine, the misfits have inflicted a difficult bur-

den, and have rebuffed quiet U.S. efforts to

The Kurdish Factor

What emerges from all this is a kind of free

new tactic is likely to be effective or wise.

No doubt the United States can cause Cuba

curity forces. Eight U.S. civilians are among the dead or missing, but Salvadoran courts bave yet to convict a single killer. To all this Ronald Reagan has an insistent reaction. Whatever the faults of "our" side, the other fellows are worse: Witness the execution of a young U.S. adviser. The only proper response to leftist violence, he contends, is to send more guns and advisers, and to appeal to guerrillas to lay down their arms and join in a November election under an interim government that they have ample reason to distrust.

It would better honor a fallen U.S. citizen to acknowledge the messy realities of El Salvador. The Reagan administration insists that the insurgency provoked the repression it de-plores, but the reverse seems closer to the truth: It is repression that ignited the insur-

gency, and helps crucially to keep it alive. In this civil war, good and decent men are on both sides of the barricade. Bringing some of them together is the key to any durable social peace. That is a purpose Americans could applaud, and it would give meaning to an adviser's death. What will prolong El Salvador's agony is the attempt to impose on this muddle the false tidiness of a simple crusade.

The Need for Cooperation

At their present stage of development, the financing needs of many of [the poorest] countries are very long-term needs, which only public aid can help to meet. This poses a very

difficult problem when, in their fight against inflation, industrialized countries are often

having to make cuts in their own budgets.

They do not find it easy to explain to their

taxpayers that they must increase taxes and

retrench certain domestic social programs

while maintaining aid to developing countries. Nevertheless, we at the United Nations are convinced that this is justified for overall

the viewpoint of the genuine long-term inter-

In a way, we should consider cooperation

among industrialized countries just as important as cooperation with the countries of the

South. If the Western countries do not succeed

in overcoming the tensions dividing them at present — commercial tensions among Japan,

Europe and the United States, and certain po-

litical tensions - there will be no chance of

their developing, in a spirit of cooperation,

peaceful relations with the South. That means, in my view, that the South has an interest in

the North's strengthening its internal coopera-tion. The need for conperation is indivisible.

cooperation, in Development Forum (Geneva).

One condition is that the misfits return voluntarily. But presumably few would go volun-tarily, in which case the United States would

From the Summit, a Climb up to Tokyo

TOKYO — By the time the Williamsburg meet-ing finally opened, interest in it here had fall-en close to zero. The real question was what comes next. There the Japanese interest, not to say anxie-

ty, is quite sharp.

After Williamsburg, there is a list of subjects dividing Japan and the United States that are going to have to be discussed, though in less spec-tacularly public circumstances.

According to one authoritative view here, the most important of these subjects is monetary policy and the exchange rates.

The precise amount is a matter of argument, but there is no doubt that currently the year is low and the dollar high in terms of each other. The reasons lie in the flows of international investment and speculation. But the effects are drastic.

A low yen keeps the prices of Japanese exports low in foreign markets, and more fiercely competi-tive than ever, while a high dollar means high prices for U.S. goods abroad. Not only are the present rates out of line, measured by the things that they can buy, but they keep moving against each other with great volatility.

In Japan as in most industrial countries, the constituency for stable exchange rates is, above all, the manufacturing industries. As an economist here observed, a company can knock itself out to shave production costs by I percent, only to see all its efforts nullified in a single afternoon by a random swing in the exchange markets.

But there is no more agreement here on remedies than there is in Washington or New York. The

By J.W. Anderson

Japanese government does not consider it realistic to talk, as the French have, about a return to the fixed-rate system that collapsed a decade ago.

The serious debate is over intervention. Theoretically, governments can intervene in the exchange markets by buying and selling currencies. In practice, it is not at all clear that even governments have the resources to counteract the tremendous tides of private money now running through the international banking system.

If you go to government or corporation offices, you are likely to hear the case for concerted stabilization by an alliance of governments to hold rates at least within a broad band. According to this view a display of determination by the most powerful governments, working together, would dannt speculators and serve to steady rates.

If you visit banks and financial specialists, you are more likely to be told that attempts at intervention are merely a very fast way to lose a lot of public money without accomplishing much. According to this logic, the only real hope for stabili-ty is to get inflation rates down in the major trading countries - the Japanese rate is now close to zero - and remove the inflation differentials that

offer opportunities for speculation.

In any event, there is little hope of any dramatic improvement soon. That is unfortunate, because the misaligned and unstable yen-dollar rates are contributing powerfully to the pressure for protec-

tionist legislation in the United States, and to the charges of unfair Japanese trading practices.

If the yen is undervalued in terms of the dollar

by 10 to 20 percent, it gives a price advantage of perhaps \$750 to \$1,500 to a Japanese compact car sold in the United States - a devestating handicap to the American competition. To take the long view, the misslignment of the

currencies is temporary in the sense that it is likely to remedy itself over the coming years, if not in the next few months. One cause of it is the high American budget deficit and the high interest rates that it generates - which, let us hope, will not persist forever. On the Japanese side, the yen is depressed by the heavy outflow of capital investment.

There is a widespread opinion here that investment opportunities are currently better elsewhere in the Pacific basin, including North America, than in Japan. That thought startles Americans, who are accustomed to complaining about the state of their own economy while reading about the resilience of Japan's. But money is moving out of Japan this year - although, again, the trend will not last forever.

Regarded from this side of the world, Williamsburg appears to be in some danger of ending up as a symbol of political evasion. The seven great pow-ers of the industrial world have invented a system of international trade that has made them rich beyoud all expectation. But they are now beginning to realize that they have not yet found a way to govern and manage it.

France's Fears Over U.S. Deficit

By Hobart Rowen

WILLIAMSBURG, Virginia — Despite the well-publicized reements between France and the United States, President François Mitterrand and at least part of the Reagan team are in accord on the matter of cutting the U.S. deficit.

All is not sweetness and light, how-ever, Just after Mr. Mitterrand's election two years ago, Claude Cheysson, the French external relations minister, journeyed to Washington and beseeched Treasury Secretary Donald T. Regan to promise to intervene, if necessary, to bolster the French franc. But, as one inside source said, "Cheysson was sent packing."

And as the economy worsened under the Socialist program, the French have become increasingly bitter. They can remember a different American attitude. In 1974, after Giscard d'Estaing's election, they got a secret promise of help from the U.S. Federal Reserve, which was car-ried out with the aid of the German Bundesbank.

gi (ampan

WHurt in A

no Reopet

So tensions have been growing. They were exacerbated after the Versailles summit last year, when Mr. Mitterrand and Mr. Reagan ex-

changed charges of broken promises.

Then, three weeks ago, Mr. Mitterrand invited foreign ministers and finance ministers who were meeting in Paris to an Elysée Palace receptions. tion, presumably for a drink and some cordial chatter.

What they got, while standing in an omate Elysée ballroom, was a speech calling for a conference "at the highest level" to restore the fixedrate international monetary system. Such a system is completely con-trary to current American policy, and the president's surprise pitch angered

some of the listeners.

But what Mr. Mitterrand is really after, as has become clear during the summit, is a new willingness of the U.S. government to reduce its prospective budget deficits in later years. These deficits, Mr. Mitterrand believes, could cut short the global recovery, keep unemployment high, and add to the social unrest already troubling France.

This is the French analysis of the current economic situation: The frag-ile economic recovery that may be getting under way now, with the United States in the lead, will not be strong enough to bring unemploy-ment — 32 million in the industrial world — down to politically acceptable levels. The fear in Europe is that because of the prospect of continued American deficits, interest rates will move up, cutting the recovery short

Europeans also contend that high interest rates caused by these deficits suck away capital from Europe and elsewhere. Not only is the U.S. deficit thus partially financed by overseas money, which then cannot be invested at home, but the expensive dollar is a burden for countries like France that pay for oil and some other imports in dollars.

From a purely selfish American viewpoint, they add, Mr. Reagan should understand that the overvalued dollar limits U.S. export potential, and brings out protectionist

The anomaly is that this sober European analysis of the current economic outlook is identical with the private view of at least two high Reagan administration officials, who believe that the administration must put \$45 billion to \$50 billion in additional taxes on the books by Jan. 1, 1985, or risk an economic crisis. The taxes would be "triggered off" later if the deficit falls below some designated level.

A White House spokesman said firmly after a recent story in The Washington Post that such a "trigger off" tax plan does not yet have the president's blessing. And that is why some Reagan advisors, although they cannot say so publicly, were hoping Mr. Mitterrand and other heads of state and government would impress the president during the summit with the global danger of record American budget deficits.

term securities.

PARIS — From the first gushings of the oil boom, Arab wealth has been resented. Above

all, it has been exaggerated. Even at the peak of the boom, the combined annual GNP of Saudi Arabia, Bahrain, the United Arab Emirates, Kuwait and Qatar, at close to \$120 billion, was only slightly more than that of Belgium. The aggregate population of those five Arab countries — including foreigners, who in some cases make up as much as 50 percent - is only million, a mere 7 percent of the Arab world's population.

To many citizens of the oil-producing countries, wealth arrived with the suddenness of a winning

lottery ticket. Some were unable to deal with it rationally. The tales of unfettered shopping sprees are the stuff of well-documented legend. On the receiving end, too, there were abuses. Real estate prices in Europe invariably rocketed once hints of an interested Arab buyer

when the West was feeling the pinch of its first major postwar recession. To Arab eyes it seemed that much of world opinion would have preferred the Gulf countries to

ad private interests — those of the AFL-CIO, teachers, farmers, stu-

dents, minorities, women and others.

industrial schemes and acres of tacky apartment blocks and garish hotels that are already proving too costly to maintain and are destined in negotiable deposits and short-A major portion of their imports to become ghost towns once the oil came from the West. Thus, the bulk companies and their expatriate labor forces pack up to return home.

Just as the energy crisis of the
70s provoked Western governof the oil revenues was recycled, di-rectly or indirectly, to generate eco-nomic activity back in the industrial countries from which it had been earned. Interest payments may have boosted the "book value" of those Arab funds, but the real value has been reaped ultimately by the for-cign banks, financial institutions

ments into seeking a better way to manage their resources, the current squeeze on oil revenues may prompt Arab governments to be-come more vigilant with their own. Already there are reports that Arab oil-producing countries plan to spend no more than 60 percent of their current budgets — a far cry from the overruns of the 70s. The largest Arab investors in the West have invariably been govern-

The crisis could also spark more. serious thought about the economic needs and potential of the Arab world as a whole. While the oil-producing countries now contribute almost as much in international aid as the United States, in many Arab countries such basic amenities as hospitals, schools and sewerage systems are still lacking.
The United Nations ranks some

Arab countries among the poorest countries in the world. In Egypt and Morocco, per capita income is still less than \$800 a year. While the Arab world takes more than 10 percent (\$32 billion) of the world's ag-America, It observes: "Only about ricultural imports, only 30 percent 3 percent of U.S. farm acreage of the arable land in the Arab world

Until now some Arab oil producers have allocated more than half of their annual budgets to defense. How wise an investment this is can be questioned, considering that none of them could rebuff a foreign attack without outside help, and that in some cases more than 75 percent of the national army is forcigners. National security might be better served by promoting the prosperity of their less fortunate Arab neighbors.

The writer, an investment banker and commentator on Middle Eastern affairs, contributed this opinion to the International Herald Tribune.

What the Democrats Need to Beat Reagan in '84'

reasons of international county as well as from WASHINGTON — The continu-ing upswing of the nation's leading economic indicators is leading most political prognosticators to the conclusion that President Ronald Reagan will run for re-election in 1984 - and win.

Seldom in recent years has the consensus among Washington insiders been more clear. Seldom, also, has it changed more rapidly; just a few months ago, Republicans were look-ing toward 1984 with fear and trepi-dation, and some Democrats had all but inaugurated Walter Mondale as the next president. Indeed, just this spring, the polls had Mr. Mondale holding a nearly 2-to-1 lead for the Democratic nomination and a healthy lead over President Reagan.

Several factors have contributed to the rapid shift, but the most important is the economic recovery. Historically, the odds of defeating an incumbent president during a period of economic recovery appear to be exceedingly slim — particularly with no overriding non-economic issues facing the electorate (in 1968, civil rights and Vietnam cost the Democrats the presidency).

Just six months ago, Democrats were determined to focus their attack. on the president himself, asking voters - as Mr. Reagan did in 1980 -"Are you better off now than you were four years ago?"

That question may still be asked of minorities, workers in "smokestack" industries and the industrial snow belt, working women and some others. But it is unlikely to be the universal theme on which a Democratic victory can be achieved.

Meanwhile, Democratic contenders have failed to ignite many fireworks in challenging Mr. Reagan. Mr. Mondale is not the kind of candidate who instills fanaticism among followers. John Glenn's organizational problems have - or had, until recent poll results, at least -- dampened interest in him among the medie. Gary Hart has just not taken off. it is is perceived, and the other Democrats — Alan Cranston, Fritz Holl-ings, Reubin Askew — are still not one, while Mr. Mondale and most seeking political asylum and not as

taken seriously.

By Alan Baron

ly blind faith in Mr. Reagan's ability to communicate — via the media — with the "average man." women, among others. For the Democrats to win, that must change.

The second trait a candidate must Members of the media may ridi-

cule a Reagan television speech—
and see public-opinion polls indicating the speech has had little impact
on public opinion—but the belief seems to remain that people "out there" were convinced. Washington's new conventional wisdom may prove to be right. But it may depend less on Mr. Reagan and

economic recovery than on the Democrats. They have it in their power to elect a president in 1984, but the odds are no better than even that they will do so. The reason is that the 1984 presidential election will not be a referen-

dum on the economy or competing ideologies. It will be a choice between the two individuals. And among the essential factors will be character and effectiveness.

In terms of character, the key trait voters have been seeking in recent years is independence; proof that a candidate can overcome his natural biases due to region (Mr. Carter being endorsed by Andrew Young), ideology (Richard Nixon going to China), interest group supporters (Mr. Reagan attacking the bankers on the withholding issue), religion (John F. Kennedy supporting strict separation of church and state in a speech to ministers).

DeLoss Walker, one of the South's most successful campaign consultants, says that "voters will pretty much allow a candidate to take any position he wants, so long as they trust his intentions and believe he be-

lieves what he says." Mr. Reagan's greatest asset is that even his harshest political enemies believe that of him. Walter Mondale's greatest problem is that — if somewhat unfairly — there is a perception that he tells everyone what they want to hear.

Mr. Reagan's basic appeal, the call other Democrats have sought to ap-migrant workers.

But today, meeting the demands of every constituency is impossible.

A president who fails to make

good on promises made to such interest groups destroys his credibility and his ability to govern. For a Dem-ocrat to win, he must speak in the national interest — distinct from the convey is effectiveness, the perception that he has the ability to get sum of group interests - and direct his appeal to individuals, not groups. He must make clear his basic comhis background as a movie actor, his age, the feeling that he is out of touch and too inflexible. mitment to the poor, the minorities, the elderly and others for whom his For a Democrat to win, he will need to use issues to demonstrate party has fought, but he must also that he will be independent and ef-fective. And to do this, Democrats make clear his pragmatism, flexibility and willingness to develop new poli-cies for changing times. must change their definition of the

Lakes of Wine

The President's Clothes I am surprised to note that Prince

Philip received the Fashion Foundations of America award for international society ("People," May 3). In my humble way I feel that I may have given His Royal Highness a run for his money; but did anyone at FFA come to look at me or even talk to me on the telephone?

I am happy, though, that Ronald Reagan received the FFA award for best dressed international statesman. He certainly won't ever win awards

CALLUGIEN. South Ascot, England.

The Tamils' Plight Regarding "Social Wors Catch Up to West Berlin" (1HT, May 6): Having lived in West Berlin for the past seven years, I found Mr. Drozdiak's article depressingly accurate.

There is, however, one point I would like to correct. The Tamils of Sri

Paul Lewis says there are "lakes of undrunk [wine]" that are "exported outside the EC with government chipping in a fat subsidy to bring

down the price to the lower levels charged by rival American farmers." This is just not true, at least not for Italian wine-producers, who are very poorly protected by the European Community There are neither price-supports nor export subsidies for bottled wines.

The reason for the "invasion" of Italian wines into the United States is few years; second, enormous investments have been made over the last Another factor in the turnaround peal to voters by constituency — as It has been the policy of the govamong Washington insiders is a nearenvironmentalists, people for peace, ernments of West Berlin and the plants, and modernization of ma-

Federal Republic to ignore the Tam- chinery and technology are now demils' political situation. Sri Lanka's onstrating their cost-effectiveness: Tamils have been demanding since third, competition in Italy (with a falling internal market) is tough and profit margins are slim. Only the fit-

Fourth, Italy's generous yields, quality-controls and fair prices make Italian wine an attractive proposition for U.S. importers. Therefore, it is not an "invasion" promoted by Italy but one due to Italian wines meeting a very specific market that is not met by U.S. producers.

PHILIP DALLAS. Rome.

A Taxing Error

Regarding "French Tax Law" (Letters, May 21-22):

A printing error made my letter read that an official extension was granted for the filing of French wealth tax returns. Rather it was an unofficial oral extension made last October for reporting non-French asmultiple. First, the U.S. dollar has sets on 1982 wealth tax returns. nearly doubled in value in the last pending Tax Treaty negotiations.

ARTS/LEISURE

Fake Food Becomes a Real Art

By Suzanne Slesin

New York Times Service
New York — In Japan many
restaurants put fake food in their windows, where it serves as a son of visual menu. Every time Yoshiko Ebihara, a Solio gallery owner, went to Tokyo, she found herself buying examples of the incredibly realistic fakes.

Eventually Ebihara began to think that she might like to exhibit them in New York, not as the craft that they represent but as an art form. The only reason she hesitat-ed was that, she said. "American people might not understand it if all we had was sashimi." So she tried to talk Minoru Iwasaki, presi-dent of the Tokyo concern that makes much of the fakes, into trying his hand at reproducing

At first iwasaki was not convinced — "he could only see the things as samples, not as art," Ebihara explained — but she persevered and he gave in. The result is an inaugural show of 30 pieces at Gallery 91 in SoHo. The show, en-"The Real Art of Fake Food," continues through July 16.

The presentation of fake food in Japan dates from the 1920s, when restaurants started serving Western-style fare. Along with fake examples of sushi and tempura, lesser-known items were reproduced and displayed with their prices so that customers might be convinced to try something new. Reproduc-tions are also used in advertising promotions and shop displays and as educational props, and they have recently been incorporated into accessories such as key rings

onto the resulting mold and more wax and layers of cotton wool are put into it. When the copy has hardened it is removed from the Iwasaki company employs more to match the natural colors. Chi-than 800 craftsmen; it has been es-timated that there are 2,000 all "When you try and copy what

"There are no rules, no technique, no school where one can learn to do this," said Harry Fujita, Iwasaki's Los Angeles representa-

mixed with oil paint is brushed standing eraftsman. "Cooked things are easier to copy than things that come from nature," Fn-jita said, "and because a lot of Japhardened it is removed from the anese food, like sashimi and vege-mold and painted. In Japan the tables, is served raw, it is difficult

nese food is the easiest of all."
"When you try and copy what
God created that's the hardest," said Iwasaki, whose remarks were translated by Fujita.

Displayed in Ebihara's white-walled gallery and all looking good enough to eat are tomatoes glisten-

cashews, cornichons falling out of a jar, chocolates nestled in a box, pork chops swimming in gravy, a bulging platter of rolled cold cus sprinkled with olives and crowned with potato salad, a gooey sausage pizza, and a table covered with

If they are not good enough to eat they are at least good enough to - to make certain they are not real. Salmon, hanging on the wall, and lobsters are the most realistic. Some of the Western food, especially a side of roast beef and a -bone steak, looked real enough

but not particularly appetizing.
That may be because Ebihara wanted to exaggerate the qualities of some of the Western fare.

It is the realistic painting of the raw or cooked food to be copied and letting it set. A liquid wax

baby! I got horns in my San Anto-nio band but they're all too stoned dropping neid. These New V to leave so I get different bands to travel to different places. Waiter!

They either kill you or kill for you in San Antonio. Some heavy cats. I'm moving there in Septem ber. They love to see purple-headed freaks: 'Hey, New Waver!' Smash, there were melodies. Ain't no melo-dies no more. You know if you ask are 10 homicides a year, sometimes dies no more. You know if you ask McCartney or Bob Seger or any of the older singers who's Number 1, they'll all say Little Richard Number 1 rock'n' roll singer. My man.

"They got some good jazz horn players from Texas — Ornette Coleman, Harold Land, Jimmy Ford, I dig horns, man. One of my favorite all-time records is Bobby Darin [he starts to sing]: 'Oh the shark has pretty teeth dear.' Horns,

kids are downers; they're druni Quadudes. They just ain't lo. in the right direction. My faz the old Mexicans. Them cats, been smokin' that good stuff-years, ain't no New Waver abo sell them their trip. I mean th

Rameau Fêted by Lavish 'Indes'

International Herald Tribune

DARIS - The lavish production (Châtelet) is one of the major events of the tricentenary celebra-tions of the birth of Jean-Philippe Rameau, as well as a significant updating of the best-known (in Paris, at least) of the 18th-century composer's stage works.

After being played for almost 30 years during the composer's life-time, beginning with its 1735 Paris premiere, "Les Indes Galantes" returned to the repertory of the Paris Opera in 1952 in a version that was hotly contested on scholarly grounds, but which was nevertheless a long-running hit - 286 performances over almost 13 years. A lot of scholarship has passed over the dam since then in matters of early instruments and style, so that musically this TMP production with the instrumental and vocal ensemble of La Chapelle Royale onder the direction of Philippe Her-

reweghe - is light-years away. On the visual side, however, large-scale spectacle is still the name of the game, even if the ma-chinery of baroque theater is a thing of the distant past. This opéra-ballet calls for grand effects and a feeling for the 18th century's taste for exoticism; its four acts have no common story line, but are a series of divertissements in imagi-nary "Indies," populated by Turks, Incas, Persians and American savages, and in which the occasional European visitor seems exotic too.

Pier-Luigi Pizzi, who is responsi-ble for the staging, sets and cos-tumes, has brought his voluptuous sense of color and space to the task, and rather than trying for a scholarly re-creation of 18th-century theater practice, he seems to be taking a look through modern eyes. at the baroque genius for elaborate spectacle. At times be literally suggests early stage machinery, as in the constantly rolling waves in the scene of the "Ture generous." but in any case the baroque spirit is always present. Even the raising of the curtain is a coup de théâtre instead of rising into the flies, the skirt of the curtain is pulled up into the auditorium so that it becomes a canopy evoking a starry night.

Period dance, too, has benefited from research in recent years, and René Goliard's choreography succeeds in giving the impression steps kept close to the ground and

Royal Unlikenesses The Associated Press

LONDON — Updated models of Prince Charles and his wife, Diana, Princess of Wales, have been panned by the critics and spectators who saw their unveiling at Madame Tussaud's wax museum. The Mail on Sunday newspaper said that "gasps of horror went up" when visitors got their first glimpse

no trace of a romantic yearning for (Tacmas), Francoise Dester (Roxane) and Tibere Ra

Aside from the sheer sound of of "Les Indes Galantes" at the the baroque orchestra, with its inci-Théaire Musical de Paris sive brass and woodwinds, much of the musical pleasure in this production came from Herreweghe's lively handling of the important dance episodes; elsewhere, however, the conductor was somewhat soft-edged, making Rameau seem a less muscular; and dramatic composer than he really is.

Vocally, there were no real weaknesses, but the result was stylistically mixed; the large cast was bourg Festival (June); "Hipp drawn from different sources and drawn from different sources and et Aricie." Aix-en-Provence there probably was not enough val (July); "Pygmalion" and time to impart real unity of style. vanx's "La Méprise" with mi Nor, in the nature of things, does interludes by Rameau, Festiva

Dollar Resumes Its Surge

LONDON - The dollar surged forward on European foreign exanges Monday, reaching another record against the French franc. In Frankfurt, the British pound finshed trading at its highest point

In Paris, the dollar was fixed at 7.5495 francs, beating the record of 7.5325 set last Friday, when it moved above 7.5 francs for the first

Dealers said the already-strong S. currency was further boosted by increased expectations that U.S. interest rates would remain high, interest, rates would remain high, making it even more attractive to Raise Profits and Ethical Issues investors.

The also said the Williamsburg ized nations had shown no sign of any serious move to curb the dol-lar's strength on world markets by

States had little room for interestrate cuts following the news on Friday of a greater-than-expected rise in the basic U.S. money supply of \$2.1 billion. The increase followed a \$7 billion rise in the previous re-

In Frankfurt, the dollar rose to its highest level for six months and the pound, strengthened by a growing belief in a Conservative victory in elections on June 9, closed at 4.036 Deutsche marks, its highest level since November last ver

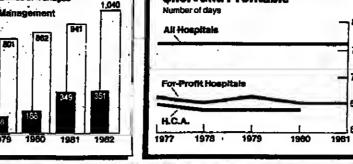

The dollar closed at 2.5150 DM, just below the day's highs, but still up from Friday's 2.5075 close. In Zurich, it finished the day at 2.0897 Swiss francs, a sharp increase on Friday's close of 2.0780. Financial markets were closed in Britain and the United States.

France, supported by Italy, has sharply criticized the high level of U.S. interest rates, which it said were attracting too much investment money to the United States

two billion francs (\$265 million) to

its annual trade deficit.
The Hong Kong dollar eased to
7.13 to the U.S. dollar from Friday's closing level of 7.07. In To-kyo, the U.S. dollar closed at 238.45 yea, its highest level since April 14, after opening at 237.95.

How The Hospital Corporation of America Measures Up Patient Stays: A Surge of Hospital Growth Short and Profitable lumber of days

Growing Hospital Firms in U.S.

New York Times Service

WALTERBORO, South Carolina - This is a poor, sleepy, rural community of 6,100 people about 50 miles from Charleston, South Carolina. It was named for the Walters brothers, who migrated there in the late 1700s to escape the mosquitos farther south. Getting sick, though, was what modern-day inhabitants dreaded most. That meant checking into the red-brick huilding over on Lemacks Street — the Colleton Regional Hospital, the only hospital in the county.

It was a dim affair, Rooms leaked when it rained,

Plaster was peeling off the walls. Squadrons of roaches, mice and rats competed for space. Well-todo denizens simply hopped in their cars and drove to Charleston and were healed there.

Then, in March 1982, a spiffy new 145-bed hospital opened its doors on Robertson Boulevard. Its proprietor is not the community, but Hospital Corp. of America, a for-profit company that rules the nation's largest hospital system.

The coming to town of HCA or one of its powerful rivals in the burgeoning hospital business — Huma-na, American Medical International, National Medical Enterprises or Lifemark — has been duplicated recently in a wide scattering of communities. Their arrival reflects a profound change in the delivery of

But a major test of corporate medicine, which could bave an enormous impact on HCA, will come in October, when a new "prospective-payment" sys-tem of Medicare reimbursement begins to be phased in during a four-year period. Medicare now pays hosand slowing economic recovery.

pitals all reasonable costs. Under the oew arrangement, the government will pay hospitals a flat fee set im advance for each patient with a particular illness. Then, if a hospital does a shoulder replacement, for instance, cheaper than the fixed rate, it will pocket

the difference.

Such a change could greatly affect HCA's profit picture, since it derives about 41 percent of its patient revenues from the aged under Medicare. The for-profits, including HCA, favor the new incentive, contending they will now be able to show their stuff.

The phenomenon of the profit-making hospital chain has arisen on such a broad scale so swiftly that it is difficult to analyze.

Hospitals run for profit have, of course, existed for decades, even centuries, though they usually have been tiny, individually operated facilities owned by doctors. But in the late 1960s, hospital chains owned and operated by sizable corporations appeared for the first time. The major impetus was the passage of Medicare and Medicard in 1965, which made health care lucrative to providers, interesting to investors. They have thrived ever since. Proprietary multi-hospisystems now own about 11 percent of the coun-5,900 community hospitals and 8.5 percent of

During the 1970s, these networks grew while the total number of hospitals fell slightly. More recently, the industry has begun to hunch into fewer and tigger chains. Some health-care experts predict that the profit-making chains could double in size during the 980s and claim 20 percent of the industry,

The emergence of these sprawing corporate empires has showered undeniable gifts on many hamlets that have traditionally had a brutal time getting able medical care. But it has also stirred up debate about their effect on the ethos of medical treatment.

The for-profit systems argue that they can run a hospital efficiently and thus put a lid oo rocketing health-care costs even while extracting a healthy profit. Their enormous reach into the capital markets enables them to construct facilities and huy advanced medical equipment that communities with empty tills cannot afford. At the same time, though, their tilt toward people who can pay to be mended and their avoidance of the utterly poor, conwelfare patient may be undercutting the assumption that everyone has a right to decent medical services.

Not surprisingly, HCA's president and chief execu-tive officer, Thomas Frist Jr., disagrees: "People say we're going to skim the cream. That's a stupid pub-

Boeing's New Jet May Be Available As Early as 1988

By Axel Krause International Herald Tribune

LE BOURGET, France - Boeing could have its version of a new 150-passenger airliner, known as the 7-7, available as early as 1988, Joseph Sutter, the company's executive vice president, said Monday.

Boeing has stated repeatedly that it believes that there is currently no market for the plane among airlines because of the recession, and company executives have often mentioned 1989 or the early 1990s as the likelies: date for its availability. Mr. Sutter, at the Paris Air Show, said the decision to move on the new plane would be determined by the market.

But other executives said Boeing could move relatively quickly, par-ticularly in light of indications that Boeing's main competitor. Airbus Industrie, may announce orders for its version of the plane — the A-320 — within several months.

If Airbus succeeds in launching the A-320 program within the next six months, Mr. Sutter said, "We would show them what we are capable of doing." He said that competing with the A-320 could involve advanced versions of the 737 aircraft, "which we think could beat the Airbus" A-320, as well as

Another Boeing executive said the availability of the 7-7 depended on the progress of development of the engine

In a related development, Pratt & Whitney executives said the en-gine it wants to develop for the 7-7, m a consortium with Rolls-Royce and other companies, is still awaiting approval of the boards of the npanies and the governments in-

Robert J. Carlson, who was recently named president of United Technologies and previously head-ed Pratt & Whitney, the company's engine-manufacturing divisioo, said he hoped the U.S. Justice Department would approve a request for an antitrust clearance made May 19 by Pratt & Whitney to proceed with its partners in developing the engine.

The other partners are a consortium of three Japanese companies, Italy's Fiat Aviazione and West Germany's MTU group

"The request is still under consideration." Mr. Carlson said. If it is approved, he said, the engine for the 7-7 would be available for delivery in December 1987. Also at the air show, Jacques

Bénichou, the president of Snecma France's state-controlled engine company, said his company's CFM56-4 engine, made in cooperation with General Electric of the United States, was a highly advanced and less costly alternative to the Pratt & Whitney engine. The Snecma-GE engine is being

developed for use in the A-320 and is to be ready for preliminary test-ing by the end of 1984. Mr. Benicbou said the costs of developing the CFM56-4 were 15 to 20 percent less than developing a to-tally new engine for the 150-passenger plane, whose costs have been estimated at around \$1.5 bil-

Commenting on the Pratt & Whitoey venture, a senior Snecma official said, "It looks enormously costly - and difficult."

Aluminum Pact Signed in U.S.

NEW ORLEANS - The three largest U.S. aluminum producers signed a three-year labor contract with the United Steelworkers of America, union and company officials said

Monday. Negotiations with the Alumi-num, Brick and Glass Workers International Union continue. Contracts with both unions were to expire Tuesday at 12:01

The new USW contract leaves base wage rates un-changed but provides for costof-living increases, the officials said. The USW contract covers about 26,000 employees of Aluminum Co. of America, Reyoolds Metals and Kaiser Aluninum & Chemical.

EC Farm Subsidies Seen Over Budget

the Prinses Margriethaven here, at the 2-mile-long (3.2-kilometer) Eu-ROTTERDAM - The freighter rope Container Terminus piers, was called the Waterberg out of which handle about one million South Africa with 2,400 containers containers a year.

On board She moored recently in Within a half-hour, huge strad-

dle carriers, tracking the boxes with infrared beams, began shifting the Waterberg's containers to rail cars for the trip to Rotterdam's vast inland market.

Rotterdam has become the world's busiest port because of this speed and sophistication at a place where two huge waterways, the Rhine and Maas rivers, flow into the North Sea and where railroads and highways fan out over a vast

Last year this port handled 250 million metric tons (about 275 million short tons) of cargo, compared with the 151 million tons that passed through Kobe, Japan, the world's No. 2 port.

But neither skill nor geography has spared Rotterdam the problems that afflict most major ports. The demise of the shipbuilding industry, with contracts going to lower-cost Far Eastern competitors. and the decline of world trade have jolted the region. And replacing jobs is becoming more difficult.

Fierce competition from neigh-boring ports, such as Antwerp in Belgium or Hamburg, for the decreased volume of cargo has forced Rotterdam to resort increasingly to automated systems that handle more cargo faster but need fewer

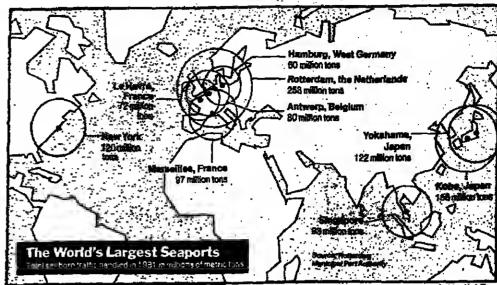

Union leaders and some city of ficials blame automation for Rotterdam's 18 percent unemployment rate, well above the Dutch average. Henk van der Pols, deputy may-or of Rotterdam, said: "We're handling more cargo than ever but with less labor-intensive methods." But Jan Bisheuvel, director of

commerce and finance at the Rotterdam Port Authority, said: "Basically, we're an energy port. And we're in a declining market." Over the years Rotterdam's immense harbor, where hundreds of cranes arch over the water against

a backdrop of refineries and oil storage tanks that march 20 miles COMPANY **EARNINGS**

Rank Offers Shares in Cerebos

LONDON (Renters) - Rank Hovis McDougall said Monday it is: offering 25 percent of the share capital of its Cerebos Pacific subsidiary, for sale in Singapore to raise the equivalent of £10.1 million (\$16.14)

The offer is underwritten by Morgan Grenfell (Asia) and Kim Eng. Securities, Rank said. The surplus over net book value on the sale of the shares will be about £7.6 million and will be credited to extraordinary items after tax in Rank's accounts for 1982-83, it said.

Cerebos Pacific is the holding company for Rank's trading subsidiaries and associated companies in the Far East and Australasia. It has forecast

OPEC, West Meet on Aid

VIENNA - A two-day meet-ing of OPEC and Western aid agencies and commercial banks opened in Vienna Monday to discuss assistance to the Third World, the OPEC Fund for International Development said.

The Vienna-based fund, the main aid agency of the Organization of Petroleum Exporting Countries, is sponsoring the meeting, which has been held annually since 1978 in Paris. The participants will examine the possibility of increasing commercial bank involvement in project-financing in develop-

ing countries in cooperation with the aid agencies. Organizations such as the World Bank and the International Monetary Fund have called recently for continued involvement of commercial banks in the Third World, despite the debt problems of many devel-oping countries.

Indonesia expects to resume its peak oil production of 1.6 million barrels of crude per day by 1985 and hopes that the current oil price of \$29 per barrel will hold until the

end of the year, Energy Minister Subroto said Monday.

Mr. Subroto said, "By 1985, the world economy would have recovered from the current recession and the energy demand will peak again, with indonesia's production ex-pected to be back to its level of 1.6 million barrels per day," United Press International reported from

GOLD + COMPUTERS = PROFITS

We at West Star have developed a technical trading system especially for Gold Futures. It is a day-trading system, and over the last six years its profits to losses have run approximately 60% to 40% in its favour, with the average profit for exceeding the average loss. We have traded this system since mid-82 and have had some spectacular results. All trades have been documented and published each week in our market

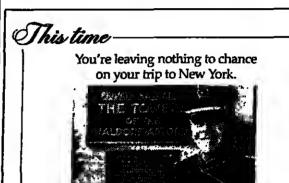

As a company we have invested heavily in modern computer technology, and use many powerful programmes to monitor all the major futures markets. Each week we publish the results of our gold system, along with analysis, charts and comments on

Wolfgang Strutz, Klaus Subjetzki, Rüdiger v. Tresckow.

BHF-BANK, Germany's Merchant Bank, achieved good results in 1982 despite extensive risk provisions and significant loan write-offs during a year buffeted by econ-

omic uncertainties worldwide. Improvements in earnings took precedence over growth in total assets and interest surplus advanced by 27.9 %. In line with the Bank's long-term strategy to strengthen its fee-income business, the structure as a full-service merchant bank contributed to a substantial increase in

commissions by 15.1%. International operations, particularly underwriting and brokerage activities, expanded quite considerably, while country lending was kept within reasonable limits spread over a broad geographical area. Main foreign lending was to corporate clients in industrialized nations with em-

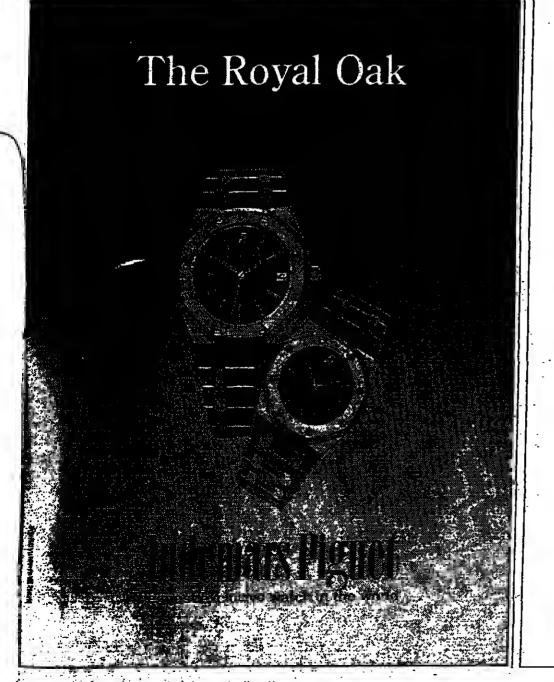

phasis on short-term facilities. The Bank also expanded its participations in specialized areas, including the formation of a subsidiary for mergers and acquisitions on an international scale. Its global presence was further extended through a branch in Tokyo which commenced operations in spring

BHF-BANK International in Luxembourg and the Group's subsidiary in mortgage lending also contributed to the satisfactory results.

MAGICIAN

By Raymond E. Feist. 545 pp. \$19.95. Doubleday, Garden City, New York, N.Y. 11530.

Reviewed by Joseph McLellan

THE latest reincarnation of J.R.R. Tolkien is also, to some extent, a reincarnation of Isaac Asimov, Sir V Isaac Asimov, Sir V. At, Edgar Rice Burroughs and perhaps kafael Sabatini and the elder Dumas. Into this enormous, sprawiing but tightly disciplined fantasy of swords and sorcery. Raymond E. Feist has thrown the material for a half-dozen novels, with characters who range from elves and dwarves to troubadours and pirates - not to mention a whole class of mandarins, slaves and a few princesses, plus assorted other damsels in distress — also a rather appealing dragon. But, of course, most of the action involves knights and magicians.

Feist's theme is one of epic scope --- a war between two worlds that become interconnected through a rift in the space-time continuum Midkemia, whose culture is essentially medi-eval European, and Kelewan, which roughly resembles pre-industrial China. Each planet has its own complex political structures and situations, which affect the course of the war and provide subplots and episodes to complicate the action.

If it all sounds a bit like those fantasy games that have been in vogue for some time on U.S. dining room tables and are now finding their dining room tables and are now finding their way into home computers, this is hardly an accident. Novelist Feist is also a designer of such games, and he has transferred his specialized skills very adeptly from one medium to another. If his novel sometimes reads like a particularly eventful evening of Dungeons and Dragons, that should present no serious problem. Fantasy games owe a lot to fantasy novels, and it is time for repayment.

At the heart of his tangled tale are two young men from Milamber as they grow from adolescence into adulthood: Pug, a foundling with a wild talent for magic, and Tomas, who aspires to become a swordsman and fulfills that hope beyond his wildest expectations.

At the beginning of the novel, they are be-ginning their apprenticeship in Crydee, a small port city on the Endless Sea, at the far Western tip of The Kingdom, Midkemia's dominar power. They are separated by the fortunes of war — Pug carried off as a slave to Kelewan, where his magic powers ultimately raise him to a special status in the alien society. Tomas is on the receiving end of a magic process, his body invaded by the spirit of a great warrior from the past — back when the healyweight swordsmen rode on dragons. As usual in fantasy fiction, it all sounds a bit silly in a dry sum. mary, but Feist manages to make it quite top. vincing — one step at a time — in the actual narration.

He is not a stylist of any special distinction, but he is quite readable; he has read his mod-els carefully, and he clearly knows how to tell a story - in fact, half a dozen stories knotted up into one. He also has a decent ear for dialogne. a sense of how to construct a scene and a good eye for significant, colorful detail whether his subject is the storming of a medieval castle, a street brawl in the slums of an old city, the wanderings of a boy lost in a cave or the mistreating of slaves on a distant planet. He fills his pages with colorful secondary characters—a gruff, pipe-puffing leader of the dwarves; a woodsman whose unerring eye with bow and arrow proves useful during a sea battle; a regal queen of the elves who turns out to be also a queen of the elves who turns out to be also a deeply human woman; a mad king, schening dukes; and an enigmatic, insidiously powerful leader of a band of criminals who is known simply as The Upright Man. He keeps the ac-tion moving fast — simultaneously in a variety of locales — and he has a vivid imagination.

Many scenes stand out: The ghastly specia-cle of Tomas struggling for control of his own mind and body is one, but most of them center on the figure of Pug and the process by which he becomes Milamber the magician, greatest of the Great Ones. It begins in a training center not unlike a Zen more structured and resches a der not unlike a Zen monastery and reaches a cli-max in a superbly constructed scene where he interrupts a gladiatorial speciacle in an arena and calls down fire from heaven on the cruel, decadent spectators. At such moments, "Magiciam is totally gripping, though there are other times to its complex, meandering plot when readers may feel able to put it down for a

The field of fantasy has grown remarkably in the last 10 years, as readers who have been lured into it by Tolkien began looking around for more of the same. "Magician" is a straightful to the same of the same. "Magician" is a straightful to the same of the same. for more of the same. "Magician" is a significant contribution to that growth.

Joseph McLellan is the music critic of The Washington Post.

CHESS

By Robert Byrne

CARI Kasparov took the eighth and ninth games to win his quarterfinal match in Moscow for world championship candidates with Aleksandar Belyavsky. Kasparov, a 19-year old Soviet grandmaster, scored a 6-3 victory over R2 since 22 N-K41, PxN Belyavsky, 29, a Russian cochampion.

by the brilliant Kasparov.

Belyavsky had used 11 . . N-B3 in game one but had trouble with the complica-tions arising from 12 B-R6! In game three, Kasparov played 12 Q-B3 but got nothing after 12 . . . PxP; 13 PxP, NxN; 14 PxN, N-Q2; 15 BxB,

NxN; 14 PxN, N-Qz; 15 BxB, QxB; 16NxP, QxP. This time he produced the powerful improvement, 12 B-B5!

How was Black to escape the pressure of the white minor pieces? After 12... NxN; 13 PxN, Belayselsy had to excid the trap

Still, it was the 76ers' defense

"I think the Lakers have trouble

defense that puts us at that awefree throws in the third period, and
some level."

went into the final quarter tied at went into the final quarter tied at

rebounds, six assists and three shots at the outset of the period to forcing the Lakers to attempt poor shots and turn the ball over, poured in 14 straight points to put the game out of reach.
"You have to credit Philadelphia

with a sustained defensive effort," said Pat Riley, the Laker coach. They take away your first option istory of the league has come back reacting to a team that plays at the own that deficit to win a series.

The 76crs outscored the Lakers, "In the second half we never let fense and rebounding that turned and your first pass and make you fense and rebounding that turned the game around. They have one of the best transition defensive teams

oming.

"It's good we got kicked in the ham said. "This is what we've been

Jillius Erving outfought the Laker trio of Bob McAdoo (right), Kurt Rambis and Jamaal Wilkes for a rebound.

Durie Tops Austin; McEnroe Wins

Compiled by Our Staff From Dispatches world," Horvath said later. "My PARIS — Jo Durie unset fourth-timing was really off today and seeded Tracy Austin, 6-1, 4-6, 6-0, Mima's was on. I had a great tour-Monday to reach the semifinals of nament, part of the problem was the French Open Tennis Cham- that I was satisfied how I did and pionships, while John McEnroe found it hard to do more." overcame a bad spell in the second In the other women's quarterfi- contained 100 strokes. When that

der, the 18-year-old defending the tournaments. men's champion, in the quarterfi-nals. Wilander, seeded fifth, out-start, lost the second set to Teltsch-Sundstrom, 6-4, 6-1, 6-3.

brought Kathy Horvath down to earth with a bang, to earn a semifinal clash with Durie. Horvath, who produced the upset of the tournsment by eliminating defending champion Martina Navratilova in

Saturday's quarterfinals, was demolished, 6-1, 6-1, by Jansovec.

Durie, who had seen off 12th-seeded Kathy Rinaldi and fifth-seeded Pam Shriver in the two previous rounds, looked like powering her way to a straight sets victory when she led 4-3 and 40-15 in the second set

But after the umpire had overruled the linesman on a controver-sial point that would have given Durie a 5-3 edge, she went on to lose the game and then the set.

But she overcame the crisis and he passed me, it was obvious he the track, too, forcing Sneva to could have passed anytime he slow down. raced through the deciding set with a dazzling array of net-hugging slices and forchand passes.

wanted to."

It went for naught, however, besomeome pointed out that the
race flagman had waved the blue

It went for naught, however, because Save later simply hauled his
turbocharged car past both Unsers slices and forehand passes.

Describing her feelings in the eighth game, Duric, the first British woman to reach the semifinals for six years, said: "I thought I was so close, but I did not hlow it ... I was still in control, although I lost the next two games."

WASHINGTON — I just returned from Las Vegas table. He buries them in hardened where I observed the World Series old Minutenan missile silos, and Poker Championships at Binion's he tells the Soviets he's only willing Golden Horseshoe. They don't quit to reduce his pile if they're willing until everybody but one guy is to reduce their land-based missile chips at the same time."

Why would we be willing to give away the MX missile chips?" "Because in an arms-race poker game they are not as valuable as they look. The Soviets could probably knock them out with a pair of aces. That's why the president oeeds them as chips. He's willing to throw them in the pot, because he wants to hold onto all the other land, sea and air chips we have in our arsenal."

"If the president says he needs the MX missiles as throwaway chips in Geneva, what's to prevent the Soviets from coming up with missile chips of their own that they don't mind losing?"

"Nothing. They probably will come up with a chip they don't re-ally care about to match the MX."

"Why are we staking the president to billions of dollars in MX chips if they don't really have any

"To show that we're serious about playing poker in Geneva. If we didn't have the MX missile "So the president has the MX missile chips and he puts them on the table?"

chips, the Soviets would believe the president doesn't have enough guts to stick out the nuclear war chips, the Soviets would believe the

"When do we get down to se rious poker with the Russians?" "Not for a very long time, be cause the president says the Soviets are playing with a stacked deck, and they cheat on every hand. He's not going to bet his stack until he's sure we can beat them at their own

"Suppose the president puts all his MX chips on the table and the Russians call him with their chips.

A Brazil Plantation House Regains Its Former Glory

By Warren Hoge New York Times Service

A LEM PARAIBA, Brazil — Candinha Silveira bad three things in mind when she and her husband, Joaquim, set out to buy their country place. "I wanted an old house," she said. "I wanted it on a hill and I wanted ed a waterfall near by."

After visiting more than 90 farflung farm properties, she satisfied all three wishes here in the southeastern region in the midst of Brazil's original coffee-growing "We are always doing some-

thing and we wanted a place to retire that would also keep us busy," she said. The 125-year-old Barra do Peixe plantation, which encompasses 4,000 acres and cost the equivalent of \$1.6 million, met that challenge too.

Its 30 bedrooms and generous

public areas were in a state of terminal decay when the Silveiras bought the property in March 1976. "Architects estimated that the whole thing would have collapsed in two years," said Sil-

"When we first walked in here, the place had become home for 8 group of dogs," said Antônio Neves da Rocha, who helped the Silveiras in their renovation work. One of them was so frightened

to see humans in here that he and jewelry from France and sent leaped out a second-floor win- their children to Portugal for schooling." The people who built the great colonial plantations of the Brazi-Today the imposing plantation

house has been restored and whitewashed and the hillsides are lian interior only strayed from once again ridged in neat hedgerows of coffee striplings. Unlike other mansions from the same era that were built in valleys to capture water best, Barra do Peixe's main house sits on a hill. Its broad facade, articulated by 34 windows trimmed in blue, is the first view of the building a vis-itor has after a nine-mile passage abruptly in 1888 with the abolidirt road from the river town of Alem Paraiba.

It is a rural refuge for Silveira, supervising director of the family textile business in Rio de Janeiro, one of Brazil's largest, and his wife, who owns an Ipanema store that sells linens and embroidery. ft is also a place to entertain weekend friends from Rio, three hours' drive away.

At times all 20 guest rooms are filled — Brazilians are too outgo-ing to be truly pastoral. The Silveiras remain true to the origins of the house, which was completed in 1859. "People didn't just from the time of the house's concome by for lunch in those days,"
Silveira said. "They came for
months and they brought their
servants." "You can't imagine the riches of that period," added his "Everyone wore perfumes

them to go to court in Rio, or to the summer palaces of the royal family in the mountain city of Petropolis, or to Europe. Brazil was an independent regency from 1822 until proclamation of the re-public in 1889, and the time was one of extraordinary prosperity

tion of slavery.

To help in the restoration the Silveiras sought out Julio Senna, a Rio architect and decorator, who has a particular knowledge of Brazilian pieces. "Our idea was to do what Europeans do with castles," Senna said. "Brazilians don't have castles, they have plantations. We restored the exterior as faithfully as possible while building interior comforts like modern plumbing. We installed all the bathrooms without damag-

struction or earlier - although there are exceptions. Pausing to rest on a modern sofa, Mrs. Sil-veira motioned toward two 18thcentury hard-hack settees. Sometimes I think people in those days died young because they only had those to sit in," she

The period identifications of pieces throughout the house bear names of the Portuguese royal family from Dom João VI up to Dom Pedro II, the last Brazilian regent. Senna and Mrs. Silveira did their buying from dealers and at auctions. Chests of dark jacaranda wood and delicately sculptured saints' statues came from churches, which have traditionally provided both an inspiration and a repository for art in

At one end of the dining room is a chapel. There, according to local historians, the wife and family of the original owner, a lanter named Simplicio José Ferreira da Fonseca, spent days in uninterrupted prayer in Octo-ber 1894 as the head of the bouse-

Candinha and Joaquim Silveira, the owners.

hold lay upstairs in a terminal de- touches of color that are as much

The floorboards had to be renewed, using wood from the region cut into the broad widths customary at the time of construction. But the masonry is the original daub and wattle, and the thick structural beams of the house have remained intact, with . the exception of one that has been replaced with a cement copy. Steel supports have been in-serted at several stress points.

The jewels of the house's colonial furniture are the decorative bedsteads and the chest and armoires painted in combinations of sky blue, yellow and pink, "This is really a jewel — you won't find this even in a muse-um," Senna said, admiring the four-poster bed in Mrs. Silveira's

The hallways and public rooms are breezy and so big that some of the staff have taken to wearing sneakers to get around. Bowls of yellow about fruit from trees in the front yard are placed around the bouse and lend the random that none of his heirs would get any of his money until it was ready to receive him. Construction was finished in four years.

a part of Brazilian decoration as they are of the landscape.

Silveira himself is a man of expansive cordiality who stands 6 feet 2 inches in his stocking feet and several commanding inches above that in the knee-high boots he uses to stride around his property. He has brought in cattle, as well as resuming the coffee plant-ing, and he said the farming oper-stion was already breaking even. Restoration of the house con-

tinues, as workers remount a 200year-old wooden mill once used in grind manioc into meal. The house took 20 years to

build, and, to judge by his portraits, the delay must have tested Fonseca, whose penetrating eyes beneath thick eyebrows do not suggest patience with dawdlers. He had better luck with a neo-Gothic church he had built 20 miles down river. He said that he wanted to be buried there and that none of his heirs would get

PEOPLE 300,000 Make 'Zoo' Of U.S. Rock Fest

A crowd of 300,000 partying to the roar of heavy metal rock turned the US Festival at Devore, California into a "zoo" that left one man bludgeoned to death over a drug deal, and the festival's promoter deal, and the festival's promoter said he was worried by the large crowd. James Dean Estell, of Pomona. California, died about 12 hours after he was bludgeoned in a parking lot at Glen Helen Regional Park. Steve Wozniak, the Apple computer designer who reportedly put \$16 million into the festival houred to attract 200,000 people. hoped to attract 200,000 people daily. Thousands of the revelers, who paid up to \$25 for each day of the festival, stayed overnight at the park as the festival continued, with David Bowie, Stevie Nicks and The Pretenders still to perform. The concert bill, including Van Hulen, Judas Priest and Ozzy Osbourne so far, drew a crowd that was overwhelmingly teen-age and male, Wozniak, 31, predicted he'll lose \$3 million to \$5 million on the festival, which continues this Saturday with a country music program.

The trustees of the estate of the novelist Isa Fleming lost an appeal in London to ban the release of the latest James Bond film, "Never Say Never Again," starring Sean Connery. The Court of Appeal uphed the High Court's ruling March 30 that producers Kevin McClory and Jack Schwartzman had not in-fringed copyright laws in the 007 film to be released this autumn. United Artists, which has prochiced every Bond film except Thunderball, supported them, hoping to maintain nearly exchi-sive rights to the superspy's spec-tacular adventures and earnings. But High. Court judge Irvine Gording held that the thriller was based on material from about 10 improduced Bond screenplays co-written and copyrighted by McClo-ry, the screenwriter Jack Whitting-ham and Fleming in the late 1950s.

The French planist Pierre Volon-dat, 20, won the Queen Elisabeth of Belgium International Music Contest in Brussels, and a prize of 300,000 Belgian francs (about \$6,000). Second of the 108 entries from 26 countries was Wolfgang Manz, 22, of West Germany and third Boyan Vodenitcharov, 22, of Bulgaria. Volondat also won the Belgian radio and TV prize as most

Museum officials said the objects stolen from the Renaissance-Does that mean they will agree on a limit for future pots?" "Not necessarily. The president may go back to Congress and ask them for another stack of arms chips because he'll say the Soviets rope, a saucer-size silver medal chips because he'll say the Soviets commemorating Admiral Niels have a lot of cards up their sleeves, Juel's victory over the Swedish flect and he can't win if he has to play with one hand tied behind his Police would not estimate the back. value of the objects. "The metal alone is worth a fortune," a duty officer said. He said the thieves apone side keeps accusing the other "What I don't understand is why parently climbed scaffolding for re-novation set up on the part of the "Because it's the only game in novation set up on the part of the castle that housed the objects.
